COL. BANTA CORRECTS MORE ANCIENT HISTORY

Prescott, Ariz., April 4, 1922.

My Dear Colonel: I see you have another "hearsay" story in The Sun. Mr. Flake is about all wrong. He is correct in two particulars, viz: the names of Joe Waters, Breed and Blanchard. I make no reference to the Scott affair. The two prisoners had their examination before the writer, then probate judge and were committed without bail. That night the two men were hanged inside the jail by vigilantes. They were not captured by Navajos. I could tell all the facts, but to tell the truth, Colonel, I am getting tired of calling down so many "hearsay" stories.

Yours truly.

Yours truly,
A. F. BANTA.

One big question, if you are going to paint - is

"How many Square Yards of Paint do I get per gallon?"

If one brand covers more square yards per gallon than another, then that paint is the one for you to buy.

"Spread" is an in-built quality of Mc-Murtry Mixed Paints. It causes a gallon to spread a satisfactory film over a larger number of square yards.

And still another element of economy: longer life! "Longer Life" makes repainting jobs farther apart—economy of the best kind.

For thirty-three years our skilled paint makers have been injecting these properties into McMurtry paints They have found the correct percentage of ingredients for spreading Quality and Long Life. Pure linseed oil-just the right proportion of white lead-a correct percentage of zinc oxide.

Experience is vital in the paint busi Every McMurtry Product reflects thirtythree years of striving for the best.
